# ***Moleta*** ARCHITECTURAL COLOR GUIDE

Architects and decorators require for their clientele a selection of colors for painting. Heretofore, color chips furnished by various manufacturers have been submitted, and frequently patrons would select two colors, one lighter, the other darker, and request the architect or decorator to supply them with a color in between these two. This resulted in an indefinite selection, and very frequently controversies resulted.

Wall Paper sample books, when submitted, permit a specific selection, and if the patron does not like his choice after it is on the wall the responsibility is entirely up to the customer.

## **ADVANTAGES OF MOLETA ARCHITECTURAL COLOR GUIDE**

The MOLETA ARCHITECTURAL COLOR GUIDE gives a wide selection of colors and makes it possible to definitely select one of the many shades of paint and thereby eliminate the indefinite selection made by many in the past.

## **MOLETA TONERS**

MOLETA TONERS are very high grade colors having concentrated tinting strength and clean undertones, resulting in beautiful pastel and deep shades when mixed in accordance with formula printed on the reverse side of each sheet in the color guide.

MOLETA TONERS may be used as they come in the can as a flat finish for all interior surfaces. When applied as it comes in the can stippling is recommended.

## **FORMULATION**

In making a formulation as directed, MOLETA TONERS and MOLETA FLAT WHITE E. S. FINISH should be mixed together as they come in the can, and thinners added only after the formulation is completed.

The architect and decorator know there is a variation to be expected in color, depending on the character and porosity of the surface on which it is applied and the accuracy with which the various mixing colors are measured.

The shades in the MOLETA ARCHITECTURAL COLOR GUIDE were obtained by the mixing of MOLETA FLAT WHITE E. S. FINISH in the White and colors and MOLETA toners, and it is unlikely that any other flat whites of other manufacturers will give a similar shade. This even includes our own stippling flat.

*Colors in the wet state frequently look entirely different than in the dry state.  
Allowance must therefore be made accordingly.*

## **MIXING EXAMPLE**

Procedure of mixing the various colors and Toners to obtain the shade selected by your customer is based on parts by volume, and if you desire to mix a given quantity we suggest that you base your calculation on gallons, as per the following exhibit:

### **MOLETA FORMULA No. 95**

8 Parts Toner Red No. 802.....	8 gal.
1 Part Toner Black No. 803.....	1 gal.
16 Parts White .....	16 gal.
Total	25 gal.

For smaller quantities use  $\frac{1}{4}$  pts.,  $\frac{1}{2}$  pts., etc. as a basis of calculation.

## SPECIFICATIONS

### **Moleta** E. S. PAINT SYSTEM

#### PREPARATORY WORK

Prepare all surfaces previous to applying MOLETA PAINT PRODUCTS as follows:

1. Remove all dirt, grease and rust.
2. Remove all loose paint.
3. Sand, scrape and steel wool all checked and rough paint and spackle or build to make smooth surface.
4. Cut out as dove-tail to generous width, all cracks in plaster, and patch with patching plaster, then sand and treat to match adjoining surfaces and finishes so that patch will not show. Take care of all holes and loose plaster in like manner.
5. Carefully fill all other holes and open points and treat so that filling will not show.
6. Spot paint all patching and filling with an extra coat of MOLETA FLAT WHITE E. S. PRIMER.
7. Sandpaper or steel wool all surfaces thoroughly before the first coat and between each succeeding coat.
8. Wash off all water paint and glue size. Use warm water with a cleanser and then rinse with clear, warm water.
9. All plaster, concrete and other surfaces must be thoroughly dry. After first coat of Primer has been applied on new or painted walls, if any spots show a dead finish these spots should be re-touched with MOLETA FLAT WHITE E. S. PRIMER, allowing twenty-four hours to dry before the following application. Spotting is generally indicative of a defective condition such as excessive lime or extreme sponginess of plaster.

#### NOTE

Allow no less than twenty-four hours for drying between each application. During cold or rainy weather, forty-eight hours or more is preferred before subsequent applications are applied.

All items in the MOLETA E. S. PAINT SYSTEM are to be crossed and flowed out, and not brushed out excessively.

## PAINTING OF INTERIOR WALLS AND CEILINGS

OF PLASTER, CONCRETE, CELOTEX, BEAVER-BOARD, ETC.

### NEW OR UNPAINTED SURFACES

#### FLAT FINISH

##### TWO COAT JOB:

- 1st Coat—MOLETA FLAT WALL E. S. PRIMER. This material must be reduced with one pint of Pure Gum Spirits of Turpentine to the gallon.
- 2nd Coat—MOLETA FLAT WHITE E. S. FINISH as it comes in the can.

##### THREE COAT JOB:

- 1st Coat—MOLETA F. W. E. S. PRIMER (in accordance with directions).
- 2nd Coat—MOLETA F. W. E. S. PRIMER and MOLETA FLAT WHITE E. S. FINISH in equal parts.
- 3rd Coat—MOLETA FLAT WHITE E. S. FINISH as it comes in the can.

#### FLAT STIPPLE FINISH

##### TWO COAT JOB:

- 1st Coat—MOLETA F. W. E. S. PRIMER (in accordance with directions).
- 2nd Coat—MOLETA FLAT WHITE E. S. STIPPLE as it comes in the can.

##### THREE COAT JOB:

- 1st Coat—MOLETA F. W. E. S. PRIMER (in accordance with directions).
- 2nd Coat—MOLETA FLAT WHITE E. S. FINISH.
- 3rd Coat—MOLETA FLAT WHITE E. S. STIPPLE as it comes in the can.

#### SEMI-GLOSS FINISH

##### THREE COAT JOB:

- 1st Coat—MOLETA F. W. E. S. PRIMER (in accordance with directions).
- 2nd Coat—MOLETA FLAT WHITE E. S. FINISH and MOLETA EGGSHELL ENAMEL (SEMI-GLOSS) in equal parts.
- 3rd Coat—MOLETA EGGSHELL ENAMEL (SEMI-GLOSS) as it comes in the can.

#### FULL GLOSS FINISH

##### THREE COAT JOB:

- 1st Coat—MOLETA F. W. E. S. PRIMER (in accordance with directions).
- 2nd Coat—MOLETA FLAT WHITE E. S. FINISH and MOLETA ENAMEL in equal parts.
- 3rd Coat—MOLETA ENAMEL as it comes in the can.

#### GLOSS STIPPLE FINISH

##### THREE COAT JOB:

- 1st Coat—MOLETA F. W. E. S. PRIMER (in accordance with directions).
- 2nd Coat—MOLETA F. W. E. S. PRIMER and MOLETA FLAT WHITE E. S. FINISH in equal parts.
- 3rd Coat—MOLETA E. S. GLOSS STIPPLE as it comes in the can.

# REPAIRING OF INTERIOR WALLS AND CEILINGS

Page 1

1. The first step in the repair of interior walls and ceilings is to remove any loose material. This can be done by using a wire brush or a scraper. If the material is very loose, it may be necessary to use a hammer and chisel.

## REPAIRING OF INTERIOR WALLS AND CEILINGS

2. The next step is to fill the holes with a suitable material. This can be done by using a putty or a plaster. The material should be applied with a trowel or a putty knife.

## REPAIRING OF INTERIOR WALLS AND CEILINGS

3. The third step is to sand the surface. This can be done by using a sandpaper or a sanding block. The surface should be sanded until it is smooth and even.

## REPAIRING OF INTERIOR WALLS AND CEILINGS

4. The fourth step is to prime the surface. This can be done by using a primer or a sealer. The primer should be applied with a brush or a roller.

## REPAIRING OF INTERIOR WALLS AND CEILINGS

5. The fifth step is to apply the final coat of paint. This can be done by using a brush or a roller. The paint should be applied in a uniform coat.

## REPAIRING OF INTERIOR WALLS AND CEILINGS

## REPAIRING OF INTERIOR WALLS AND CEILINGS

## REPAIRING OF INTERIOR WALLS AND CEILINGS

## REPAIRING OF INTERIOR WALLS AND CEILINGS

6. The sixth step is to clean the surface. This can be done by using a damp cloth or a sponge. The surface should be cleaned until it is free of dust and dirt.

## REPAIRING OF INTERIOR WALLS AND CEILINGS

## **PAINTING SPECIFICATIONS FOR EXTERIOR PAINTING**

### **PREPARATORY WORK**

All paint materials shall be thoroughly stirred or agitated until the various ingredients are completely intermixed.

No exterior painting shall be done in rainy, damp or frosty weather or until the surface is thoroughly dry.

All oil, grease, dirt or other foreign materials should be removed from surfaces before painting.

Remove all loose paint. Sand, scrape and steel wool all checked and rough paint.

Knots or sap streaks in lumber shall be given a coat of MOLETA PIGMENTED REINFORCING PAINT LIQUID before the application of the first coat, or priming coat.

Nail holes or similar imperfections shall be puttied smooth after the first or priming coat has become hard and dry.

No coat of paint shall be applied until preceding coats are thoroughly dry.

All unprimed galvanized metal shall be properly treated with a wash and coated with a high grade metal primer.

### **NEW EXTERIOR WOODWORK**

#### **2 COAT JOB:**

1st Coat—MOLETA READY MIXED PAINT reduced with one pint of pure linseed oil and one-half pint of turpentine to the gallon.

2nd Coat—MOLETA READY MIXED PAINT mixed with  $\frac{1}{4}$  Gallon MOLETA PIGMENTED REINFORCING PAINT LIQUID to the gallon.

#### **3 COAT JOB:**

1st Coat—MOLETA READY MIXED PAINT reduced with one pint of pure linseed oil and one-half pint of turpentine to the gallon.

2nd Coat—MOLETA READY MIXED PAINT reduced with one pint of turpentine and one-half pint of pure linseed oil to the gallon.

3rd Coat—MOLETA READY MIXED PAINT mixed with one quart of MOLETA PIGMENTED REINFORCING PAINT LIQUID to the gallon.

### **REPAINTING OLD EXTERIOR WOODWORK**

#### **2 COAT JOB:**

1st Coat—MOLETA READY MIXED PAINT reduced with one pint of turpentine and one-half pint pure linseed oil to the gallon.

2nd Coat—MOLETA READY MIXED PAINT mixed with one quart MOLETA PIGMENTED REINFORCING PAINT LIQUID.

If the painter wishes to mix his own material and is not inclined to use a ready mixed paint, MOLETA T. O. W. is to be specified, reduced in accordance with directions. We recommend that after the painter has mixed his T. O. W. that he add  $\frac{1}{4}$  Gallon MOLETA PIGMENTED REINFORCING PAINT LIQUID to each gallon of the finishing coat.

## REINFORCING PAINT LIQUID

REINFORCING PAINT LIQUID is a special paint which is used to reinforce concrete and masonry work. It is applied in the form of a liquid and dries to a hard, durable finish. It is used on all concrete and masonry work, including walls, floors, and ceilings.

REINFORCING PAINT LIQUID is made from a special mixture of pigments and binders. It is available in a variety of colors, including white, gray, and black. It is also available in a variety of finishes, including smooth, textured, and stippled.

REINFORCING PAINT LIQUID is applied with a brush or roller. It is applied in a thin, even coat. It is allowed to dry for 24 hours before a second coat is applied. It is applied to all concrete and masonry work, including walls, floors, and ceilings.

## **OXFORD SYNTHETIC GUM ENAMEL**

### ***THE ENAMEL THAT HAS EVERYTHING***

Also comes in a Semi-Gloss Finish. Approximately 15 days after application this Finish gives a reproduction of a High Gloss Enamel rubbed down with pumice stone and water.

- |  |   |
|--|---|
| 1. Does not sag.                         | 6. Great spread.  |
| 2. Tremendous hiding.                    | 7. Rapid drying.  |
| 3. Excellent white color.                | 8. Very flexible.                                       |
| 4. No printing or marring.               | 9. Beautiful gloss.                                     |
| 5. Perfect flow - free from brush marks. | 10. Easy working. Works as freely as a long oil enamel. |

### **UNUSUAL QUALITIES**

Dishes and objects placed on window sills and other surfaces that were painted with long-oil enamels frequently bring complaints of printing and marring the surface. OXFORD SYNTHETIC GUM ENAMEL WILL OVERCOME THIS CONDITION.

An ideal finish for all interior surfaces of plaster, wood, metal, etc.

OXFORD SYNTHETIC GOW EMANET

MOLETA

**MOLETA EGGSHELL GLOSS STIPPLE**

is intended for use on walls and ceilings of plaster, brick, concrete or cement, where a gloss stippled finish is desired. It dries with a tough film and is exceptionally white in color. Like MOLETA FLAT WHITE E. S. FINISH, it is washable.

**MOLETA FLAT WHITE EGGSHELL STIPPLE**

is a product that is intended for use on walls and ceilings of plaster, brick, concrete or cement, where a stippled finish is desired. MOLETA FLAT WHITE EGGSHELL STIPPLE has exceptionally white color and is ideal for stippling purposes. Like MOLETA FLAT WHITE E. S. FINISH, it is washable.

**MOLETA ENAMEL UNDERCOAT**, as the name implies, is an ideal foundation coat for enamel, to be used on all interior surfaces. It flows together excellently and dries leaving practically no brush lines. It is formulated so that subsequent applications of enamel would not be excessively absorbed into the undercoat, therefore permitting the vehicle in the enamel to be held up so that maximum gloss and a uniform finish will result.

**MOLETA BETTER GLOSS WHITE ENAMEL**

dries rapidly, and can be used for both exterior and interior purposes. It can be used on walls and ceilings of plaster, on woodwork, metal, furniture, boats and any type of machinery; in fact, it can be used for any purpose where an enamel finish is desired. This is a non-yellowing type of enamel. Also comes in a SEMI-LUSTRE finish.

**MOLETA COMBINATION PRIMER & UNDERCOAT**

is intended as a priming coat on surfaces of wood that have not been previously painted. It also acts as an undercoat. This product has very great hiding powers, and with one coat of MOLETA COMBINATION PRIMER & UNDERCOAT and one coat of OXFORD SYNTHETIC GUM ENAMEL, or MOLETA BETTER GLOSS ENAMEL, will give a job equal in appearance to the average three coat job.

**MOLETA WALCOFILM FIRST COAT**

is intended for use on walls and ceilings that have been papered and where one does not wish to remove the wallpaper. **MOLETA WALCOFILM SECOND COAT** is to be stippled on application, as that eliminates seams and other blemishes from coming through on the finished surface. All loose paper should be removed before applying WALCOFILM FIRST COAT.

**MOLETA #608 DEAD FLAT**, as the name implies, dries with a dead flat finish, and is intended for use on interior surfaces of plaster, cement and stucco.

**MOLETA HEAT & FUME RESISTING ENAMEL**

is intended for interior use in bakeries, dairies, etc. where heat and fumes have a tendency of discoloring enamels.

**MOLETA BRILLIANT COLORS** are light fast and are intended for interior as well as exterior use. They dry with a high gloss and have the ability of retaining their colors over an indefinite period of time, and can be used in many places where a high grade product of this kind is required.

**MOLETA TONER** is intended for use in tinting MOLETA FLAT WHITE E. S. FINISH. It also can be used as a flat finish for interior surfaces. When applied as a flat finish, stippling is recommended. Stir thoroughly and use as it comes in the can. If necessary to thin, use turpentine sparingly.

**MOLETA PIGMENTED REINFORCING PAINT LIQUID**

has many uses when applied as it comes in the can. It can be used for exterior trim and sash work, the finishing of dados, on plaster, wood, concrete and metal surfaces, both interior and exterior. One quart of this material added to one gallon of mixed T.O.W. or mixed lead and oil paint, for exterior work, will reinforce the waterproofing qualities, improve the gloss, leveling and drying qualities of your paint, and reinforce the color you are now using in tinting your paint, which will result in better retention of color.

**MOLETA PORCH & DECK FLOOR ENAMEL PAINT**

is intended for use on wood, concrete or linoleum floors, both interior and exterior, is a very high grade porch and deck floor enamel paint, and has excellent working qualities. Comes in eight different colors.

**MOLETA BRICK, CEMENT & STUCCO PAINT**

is scientifically prepared for use on walls of exterior surfaces. It has exceptional density, free-working qualities and it is very durable. It dries with a semi sheen. It comes in six standard colors and white.

**MOLETA T.O.W. PASTE**

is not a substitute for white lead, but is a distinctly superior product both from the standpoint of the remarkable results it produces as well as the great saving in labor it affords. It is intended for either interior or exterior use, and when properly mixed brushes on with exceptional ease. It is non-porous, exceptionally white in color and very durable. Will not discolor from the action of sulphur fumes — a remarkable advantage for industrial establishments. Can be tinted to any color desired. Two coats of T.O.W. are equivalent in hiding to three coats of white lead.

**MOLETA READY MIXED T.O.W.**

comes in seventeen beautiful colors. It is intended for exterior use and has excellent hiding as well as excellent wearing qualities.

**MOLETA SPAR VARNISH**

—This varnish is very pale in color, full in body, has exceptional free-working qualities under the brush, dries with a beautiful high lustre, is extremely tough and water-proof, and can be used for either exterior or interior work. This item is the finest quality of exterior varnish that it is possible to produce.

**MOLETA 4 HOUR VARNISH**

—This is the most popular varnish manufactured by us. It will set in one hour and dry in four hours. It is absolutely water-proof and will not turn white. Manufactured by us especially for floors, it can nevertheless be used for almost any other work requiring varnish. Dries with an exceptional fine lustre.

**MOLETA FLAT VARNISH**

—This material dries with a beautiful rubbed effect, and is recommended by us where a flat varnish is desired.

**MOLETA SEMI-LUSTRE VARNISH**

—This material is pale in color, works freely and dries with a beautiful sheen.

**MOLETA FLAT WHITE EGGSHELL PRIMER**

is a first coater, intended for use on interior plaster, concrete, brick, wallboard or cement. It produces an elastic coating with excellent sealing properties. Will help eliminate hair lines from coming through on subsequent coats of MOLETA FLAT WHITE EGGSHELL FINISH, the TRULY WASHABLE FLAT paint.

**"ALL MOLETA PAINT PRODUCTS ARE MANUFACTURED OF  
THE HIGHEST GRADE MATERIALS AND IN A MOST  
SCIENTIFIC MANNER."**

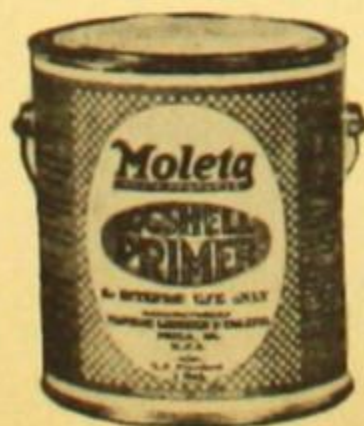

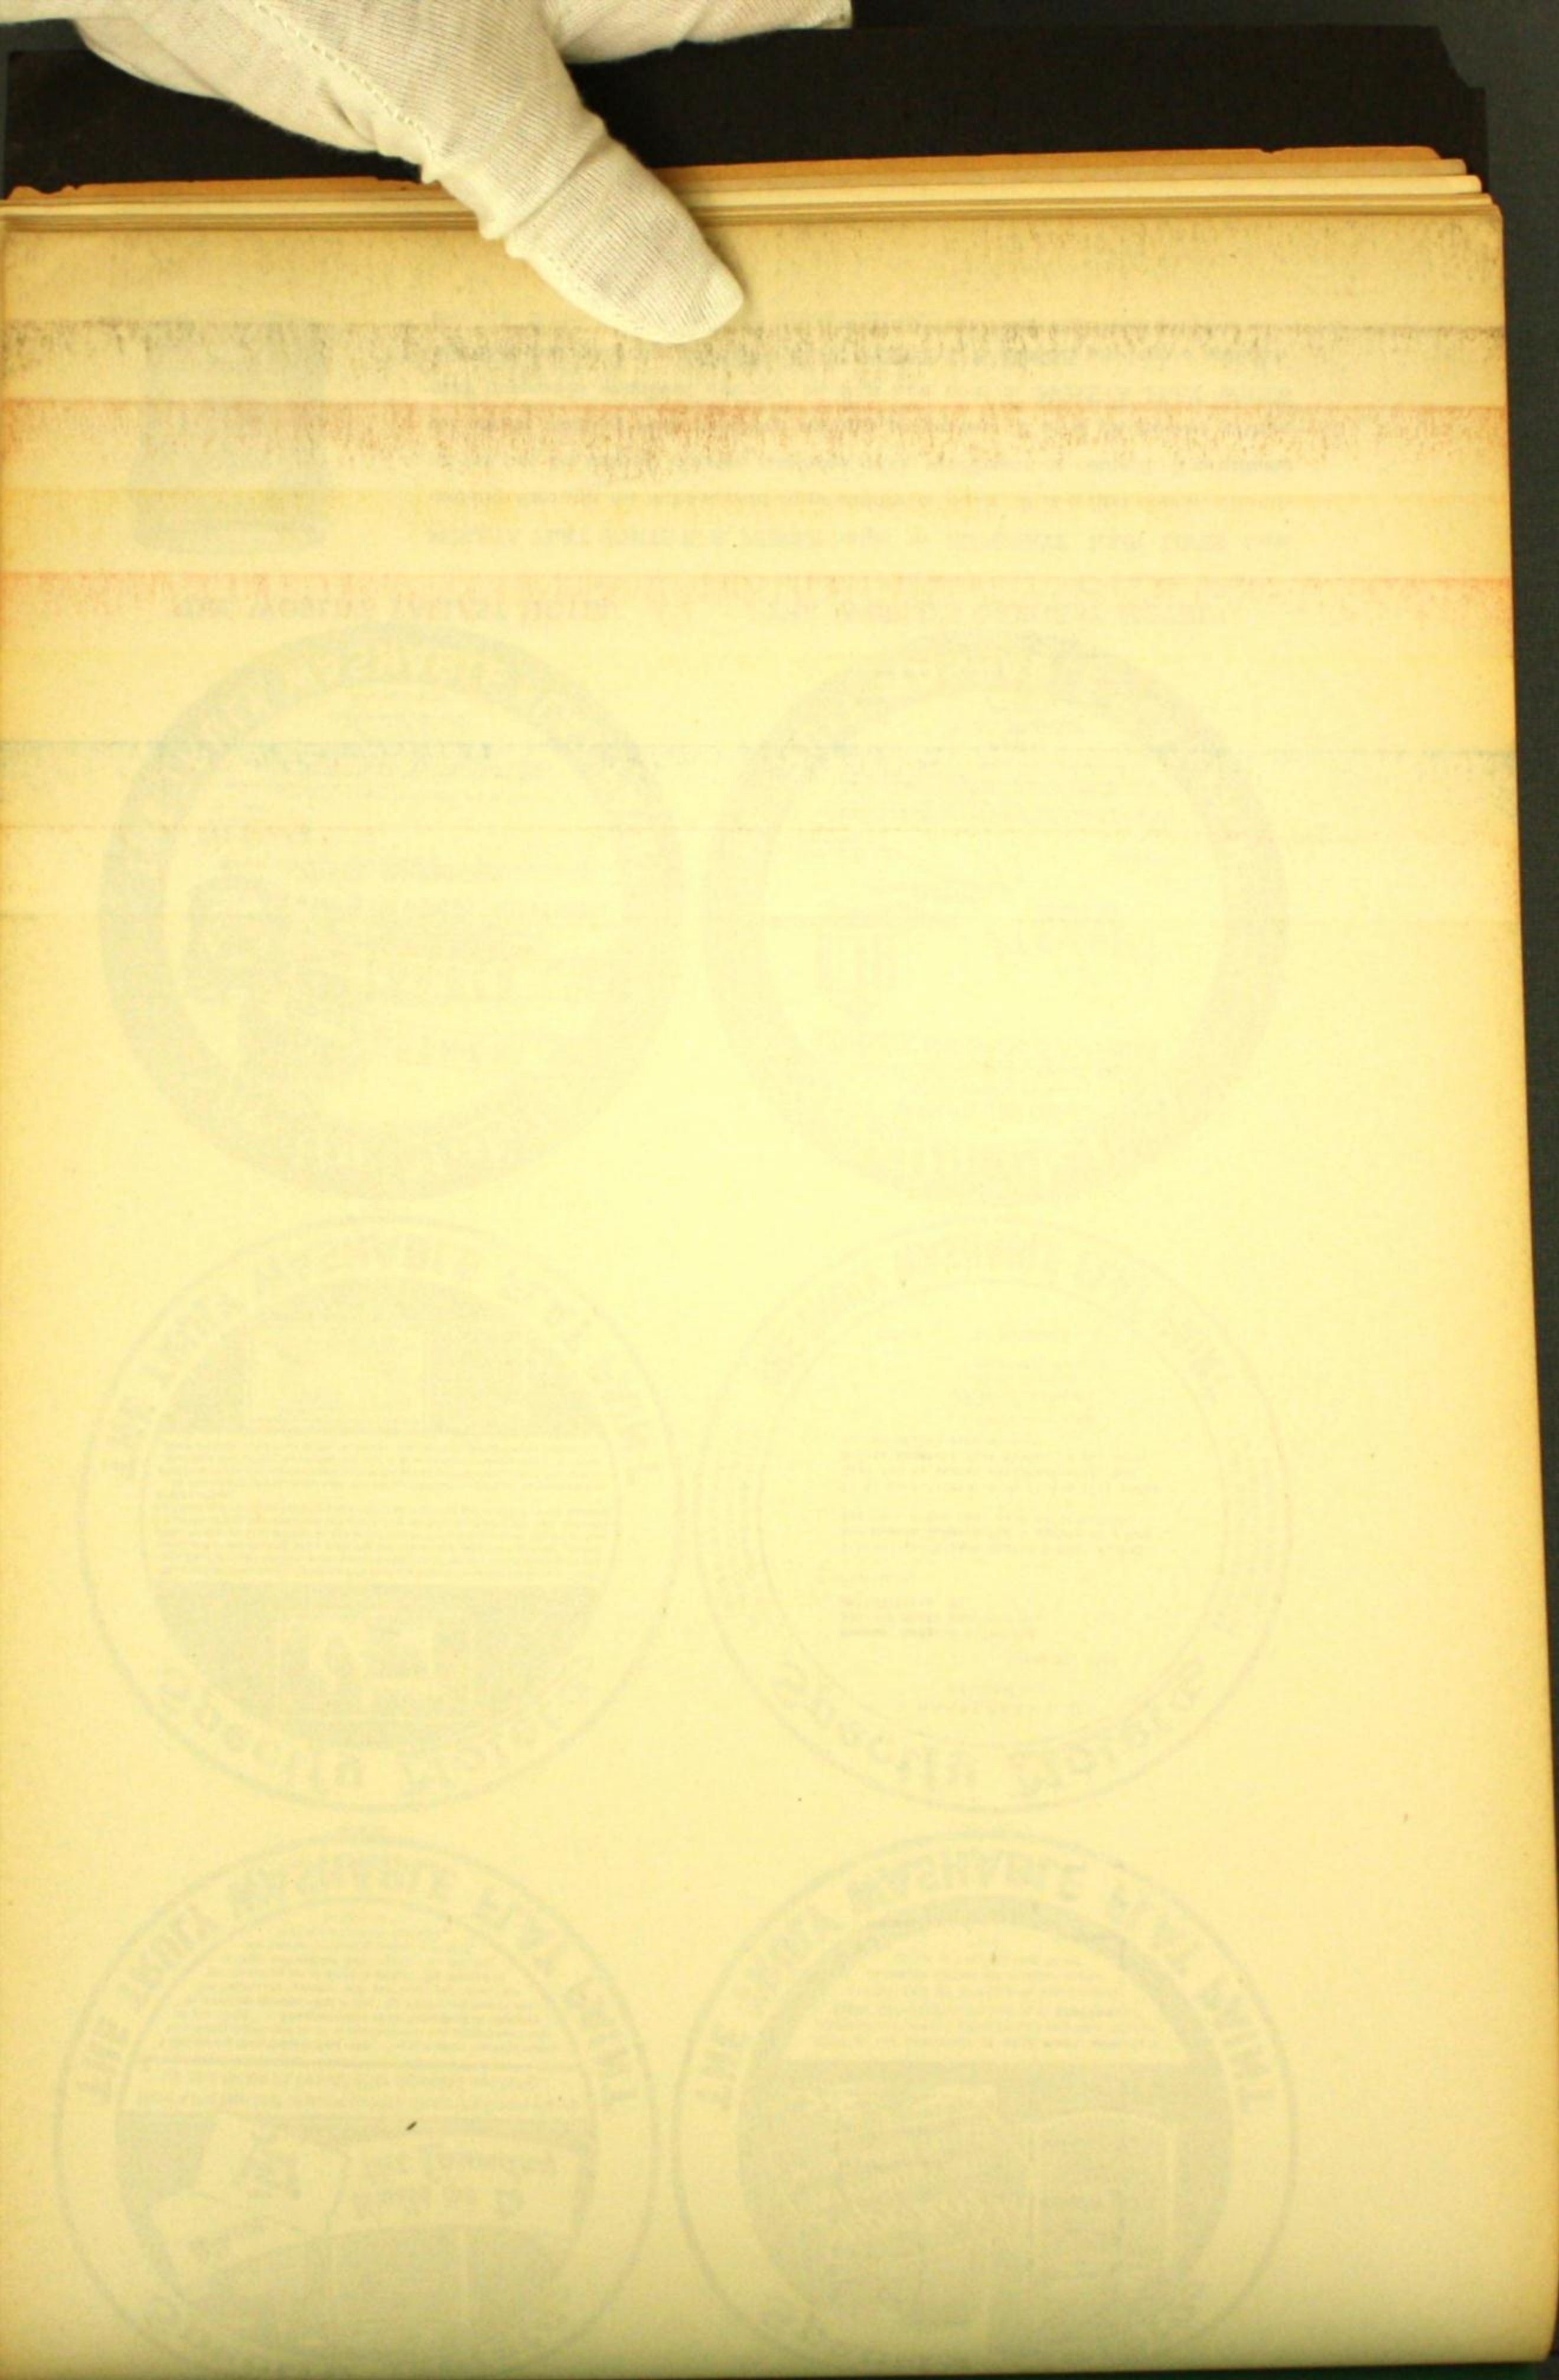

"THE WORLD'S TALLEST HOTEL"

"THE WORLD'S LARGEST HOTEL"

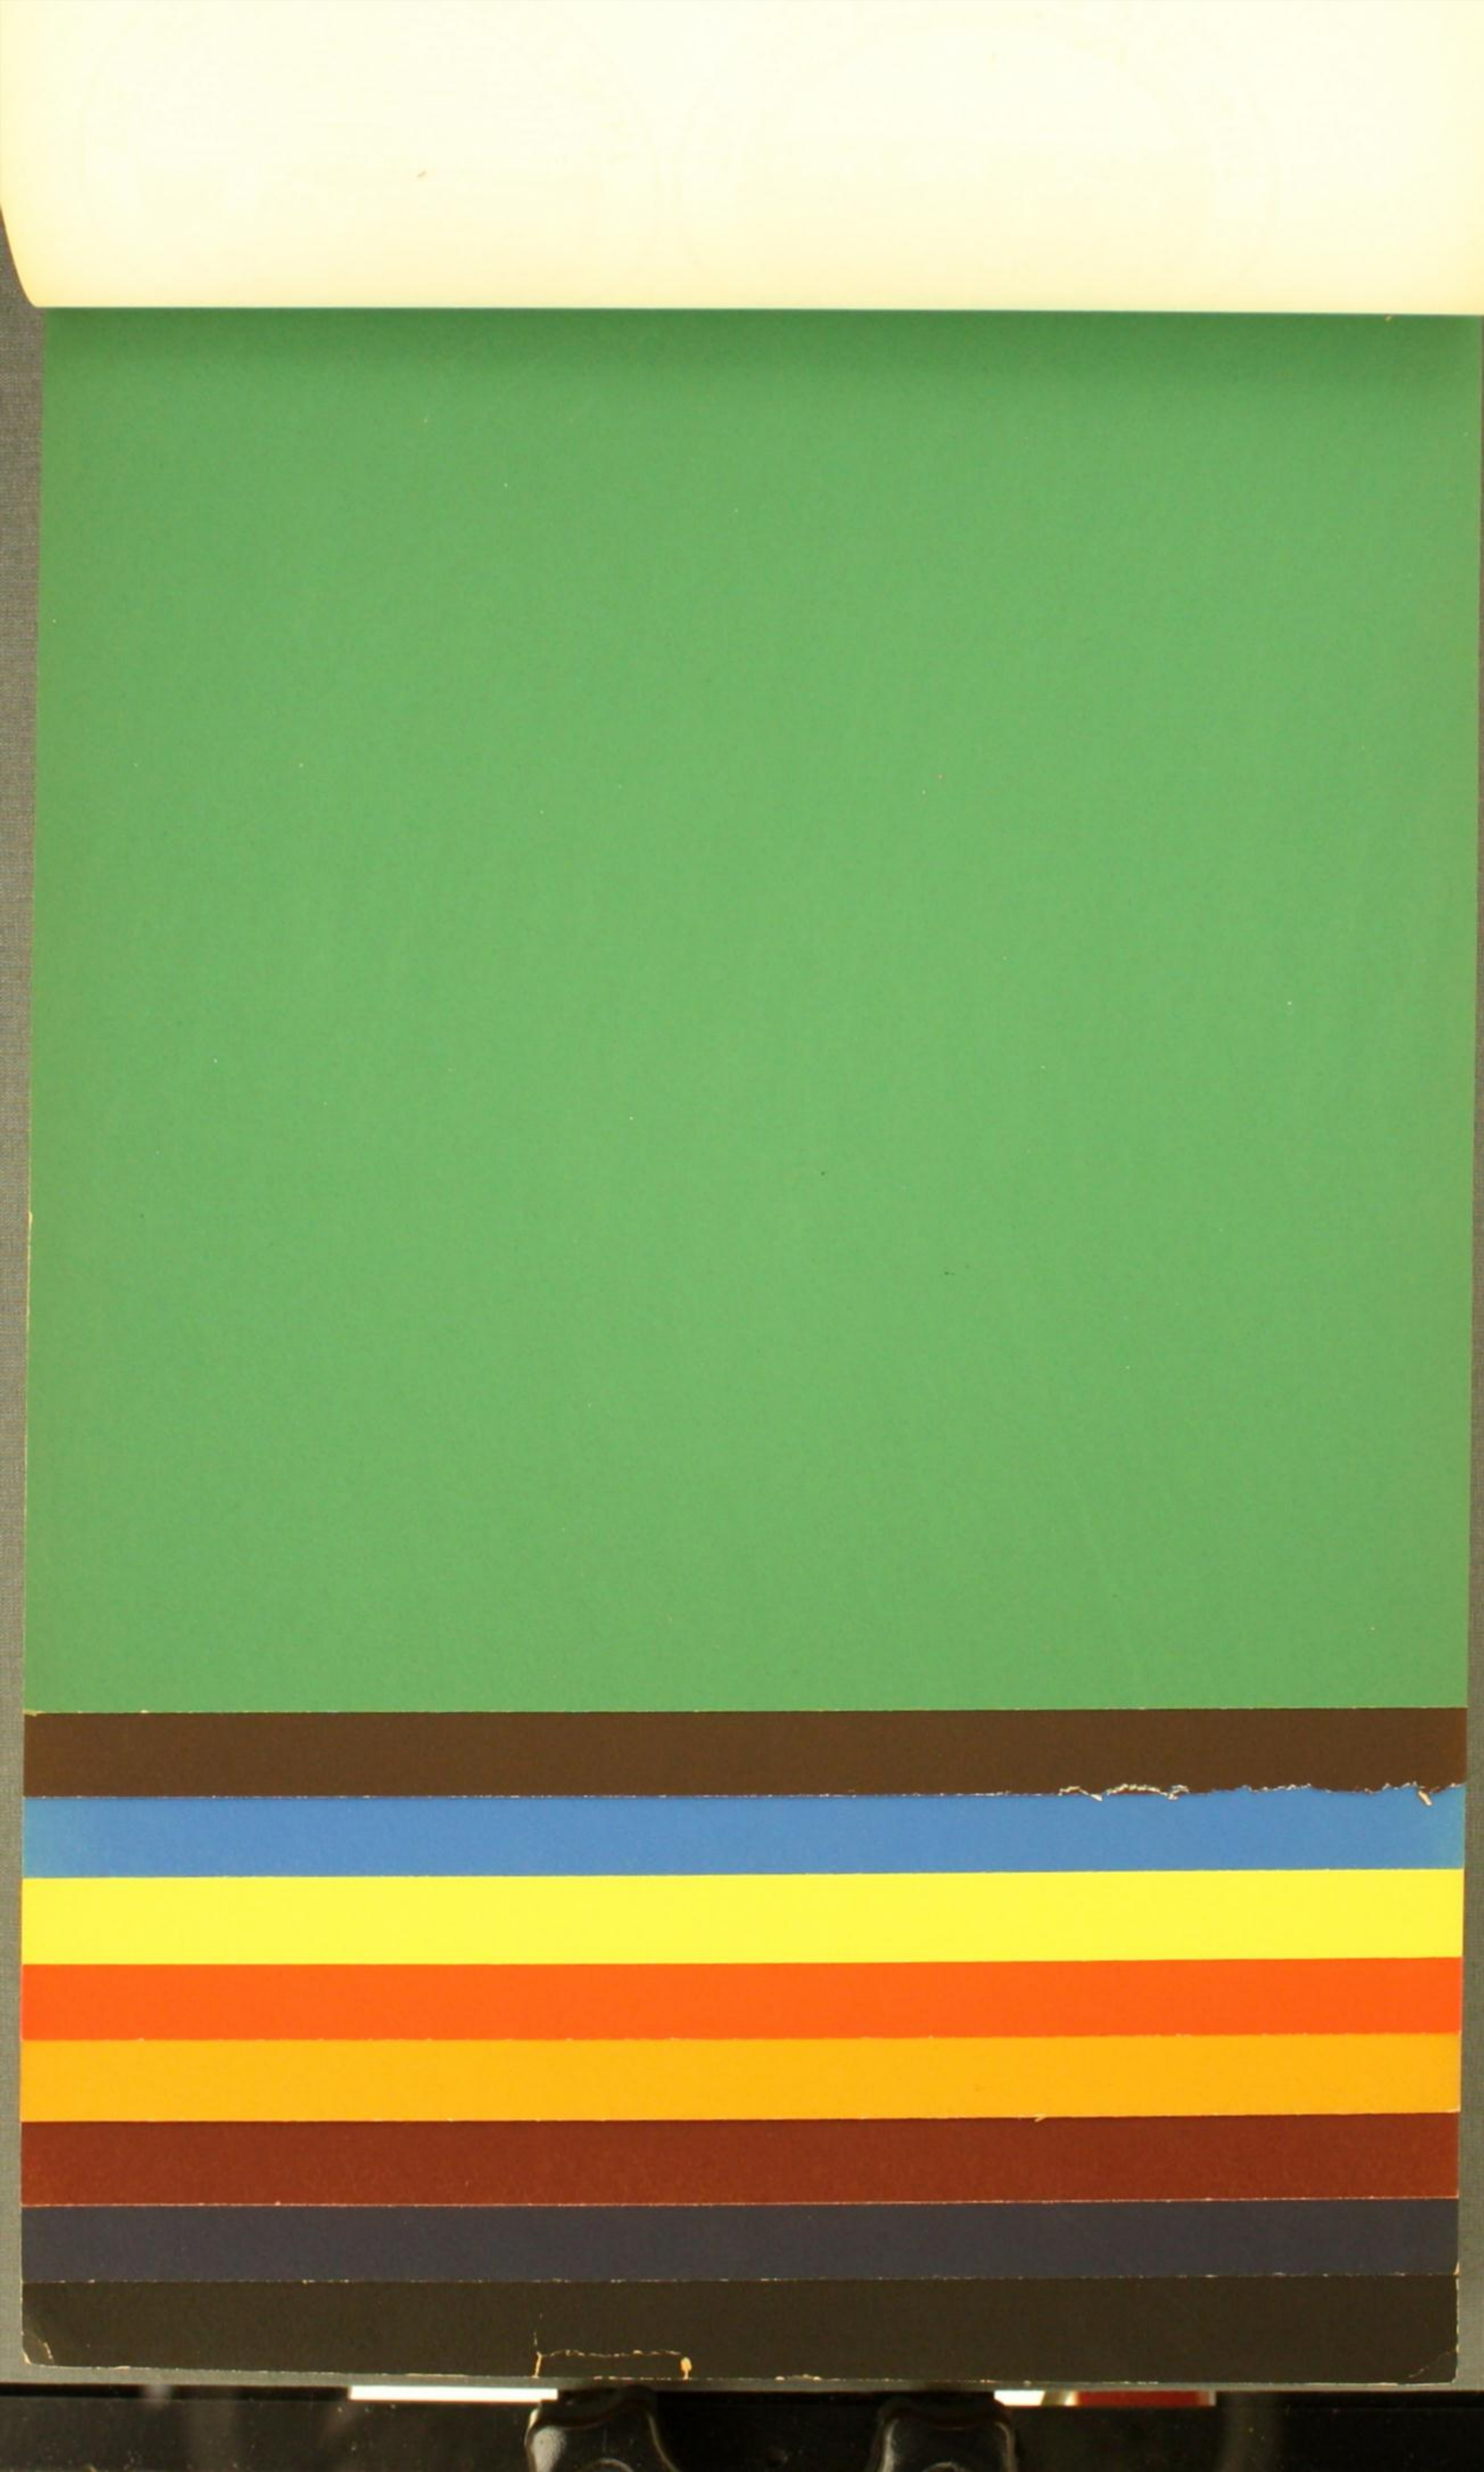

MOLETA FLAT WHITE E. S. PRIMER helps to ELIMINATE HAIR LINES from coming through on subsequent applications of paint. It is a first coater, intended for use on interior plaster, concrete, brick, wallboard or cement. It produces an elastic coating with excellent sealing properties. It is a pigmented primer and possesses excellent opacity, so that one coat of MOLETA FLAT WHITE PRIMER and one coat MOLETA FLAT WHITE E. S. FINISH produce a satisfactory job. It can be tinted to any shade desired.
